iLinux OS Talk

iLinux is amazing!

root 06 Mar 2022 13:58:15

To combat the amount of hate posts here, I decided to tell: "I love iLinux!"

FYI this will not stop the paranoid "Linux Mafia Army" from attacking iLinux or any other distro that they are not paid to promote...

#2. Fotini 07 Mar 2022 11:20:38

And the paranoia continues...

These people are so full of HATE as I read in **https://talk.ilinuxos.com/iLinux%20OS%202%20%22GALAXIA%22%20-%20Opinions/ilinux_is_the_best_linux_distro_i_ever_used** that they can't see beyond their "Linux wannabe bubble"...

It's pathetic at best.

@AaronTechnic just admitted that he HATES iLinux. He used the word HATE!

What a nice and loving "Linux Community" they represent...

@root you hit 100% bullsey when you exposed them for what they truly are.

I am the real "root" and I didn't begin this thread.

So It must be relative to the security breach described in **https://talk.ilinuxos.com/iLinux%20OS%202%20%22GALAXIA%22%20-%20Opinions/ilinux_is_the_best_linux_distro_i_ever_used** :

> *“ Oh, by the way, thank you for showing us that you have managed to hack your way into the security of this Forum Software (which is not Developed by us) and that you can post as us, aka "iLinux Creator" or "iLinux Support Team", but we will never lock or shut down this forum because we have a little surpise for you. ”*

It seems like some members of the "Linux Mafia Army" Attack Group tried to cool things down while retreating because they didn't expect such aggresive resistance from the iLinux Team.

Never the less I am in love with iLinux, this Community and the mentality of iLinux Devs.

Nowadays the Linux landscape is so rotten and this Community is a precious haven...

Uhh I think it's not a security breach, but a bug in this forum software.
By naming your Username as a different character set, it will look like as you are the one who post it, but under that it's a different user. For example root-1 is Arabic, then another root-1 is Cyrillic, that's it.

Pretty simple explaination, and actually I'm very surprised that you are not even noticing about that :))

#6. ClickNin 09 Mar 2022 05:46:38

But even so this forum looks like it doesn't have any protection available, and the name of this software is, unknown to me. So I guess it can be hacked very easily, even a normal person can do it.

#7. iLinux Support Team 09 Mar 2022 06:44:40

@ClickNin

A Bug can be a Security Breach.

Of course we have thought of the Character Set "hack".

But we really don't care since this Forum Software is so fast and so convenient for our needs and for the Privacy it offers.

And since we keep Daily Automated Server Backups and PDF Webpage copies of every Thread when someone posts, it's easy to prove anything.

But the most important think in what you say, is that you have tried the Character Set "hack" and you know it works...

And the question is: Why did you try it?

Only someone who would want to undermine and sabotage would do that...

Well I don't even have to try, just save this site, then see how text got parsed and we will know if different characters have different looks or not.

#9. iLinux Support Team 09 Mar 2022 07:39:41

@ClickNin

You didn't mention any other possibility, so you have tried it.

And the question remains: Why?

#10. ClickNin 09 Mar 2022 07:43:54

"you have tried it.

Proof?
Well, I don't want to deal with strict legal actions in my country so, why I need to do it?

#11. iLinux Support Team 09 Mar 2022 07:57:57

@ClickNin

> *“ Proof? ”*

You didn't mention any other possibility, so you have tried it.

Don't worry for Legal actions.

We have more important things to do...
