iLinux OS Talk

iLinux is terrible.

Andrew 08 May 2022 12:16:39

Why does iLinux have AnyDesk open all the time? Is the creator spying on me? It looks like there is no source code available for iLinux. Very suspicious. I installed Ubuntu instead with the trust of Canonical.

AnyDesk?!? Isn't that what Indian scammer usually use to scam others? Why iLinux creator would include that virus into their OS? I don't even know it was preinstalled. Thank you for letting me know.

@Andrew @i2

Nice try...

We told you, you don't have what it takes to be an Actor...

AnyDesk is not open by default.

Check AnyDesk Settings and **Control Center > Startup Applications**.

More about the Company at **https://anydesk.com** .
