iLinux OS Talk

iLinux is the best Linux distro I ever used!!!!

iLinuxisCool 24 Feb 2022 10:17:19

Woah, for a longgg time I'm bored of Windows and macOS, then i found iLinuxOS and it changed my life!!!!
The interface is so easy to use, the functions are super cool. They are real innovations!!!

I see a lot of hates here but iLinux is truly hero for my computer, I'm loving iLinux right now!

Thanks the creator for creating such awesome OS.

Replies 1

#1. Optimus Prime 01 Mar 2022 16:37:13

Changed your life huh?! How?!

#2. Linux Soul 02 Mar 2022 16:53:48

@iLinuxisCool

I'm very curious to hear your story with iLinux!

#3. include_stdio_h 05 Mar 2022 17:37:39

@iLinuxisCool

We all know you are @iLinux Creator kissing your own arse on an alt.

You and your hundreds of alt accounts don't fool us. You claim that your reason for not requiring registration for this forum is that you want to guarantee uncensored free speech, but everyone knows the real reason is so you can pull off shit like this.

Get a life.

#4. iLinux Support Team 05 Mar 2022 20:37:57

@include_stdio_h

Why so nervous "Linux Mafia Army"?

Want to talk about (your) alt accounts "Linux Mafia Army"? Check your mirrors and check previous Threads in this Community.

Your staged ironic provocation with **@iLinuxisCool** in this Thread was so obvious, even a Rookie in PSYOPS could see it coming from 1000 parsecs away.

Oh, by the way, thank you for showing us that you have managed to hack your way into the security of this Forum Software (which is not Developed by us) and that you can post as us, aka "iLinux Creator" or "iLinux Support Team", but we will never lock or shut down this forum because we have a little surpise for you.

Stay tuned...

It's obvious that Uncensored and Uncontrolled Free Speech is disrupting the reputation of your Orwellian self proclaimed "Linux Community", your long term plans and your flow of "Cookies" money, so let's remember what @root said about you:

> *“ Well, let's talk about the so called "Linux Community"...*
>
> *It's no secret that 99% of all those "Linux Community Websites & Linux YouTube Chanells & Linux IRC Chat Channels", promote 5-10 Linux Distros out of 100's. This is not random.*
>
> *And it goes deeper that that. The hostile behaviour of this "Linux Mafia Army" when you talk about other distros than the ones they push, is classic...*
>
> *All those "Linux Community Websites & Linux YouTube Chanells" sell your browsing data to 1000's of capitalist companies by spying on you via Cookies, so even in most Linux distros (FOSS or not) you are the product...*
>
> *I am not saying that it's bad to want to make money, but if at the same time you are preaching Internet Freedom and FOSS, it's a bit hypocritical at best.*
>
> *So, don't lecture us about the so called "Linux Community".*
>
> *We know the subversive and covert tactics of your "Dark Web Gang": Online Mob/Swarm Misinformation, Online Mob/Swarm Slandering, Online Mob/Swarm Character Assassination, Online Mob/Swarm Psychological Operations, Online Mob/Swarm Sabotage.*
>
> *You may have positioned yourself at the backbone of the internet, pulling strings from the shadows, but you are not invisible.* ”

> *“ They want you to release your Proprietary Code as FOSS in order to profit from it.*

> *It's a classic tactic of the "Linux Mafia Army", to apply negative psychological pressure in order to discredit and discourage developers, steal their code and profit from it in any way.*
>
> *And because they plan far ahead, I think they fear of what iLinux may become.* ”

#5. iLinuxisCool_ 06 Mar 2022 04:06:08

@Linux Soul

OH, iLinux is really fantastic! From innovative UIs, macOS applications compatibility to OLD COMPUTER SUPPORT!!

Dynamic Virtual Memory is an innovation, it allow me to have full control over the system and allow it run faster without worrying about mamory!

500+ built in apps is more than enough for me to start working immediately when I turned on my computer.

Ignore all of hates about iLinux, I feel in love with it.

#6. ClickNin 07 Mar 2022 04:18:49

@iLinux Support Team

Let me say again, there is no "Linux Mafia Army" here.
You and your stupid alts talked about it first, I can show the proof now. I'm never mentioned about it before, see my first post.

Is that Free Speech? NOPE.

You say you respect Free Speech, meaning everyone have the permission to say whatever they want, then when they say that iLinux is bad, iLinux is worse, iLinux is missing, etc. You say that they are a part paranoid "Linux Community" when they never talked about it before. Then you continue pushed this to this day. This isn't what a friendly community should be.

Now, **@include_stdio_h** or whatever you are, hacking isn't good.

Your license is a GPL Violation and this might been bring to the court of USA.
The 20 EURO fee for Enterprise is a another Intellectual Property violation, by "selling" or whatever you are doing with that so called "fee", in this case if you bundled the whole OS with all of it's preinstalled applications, you are SELLING the things that ISN'T BELONGS TO YOU. There is no clear explains in the license wherever saying that what software is bundled with it when the Enterprise paying that 20 EURO "fee".
Saying something that is "scam" isn't a bad and illegal thing, so it's impossible to bring someone to the court if they say that "this thing is a scam".

Regarding that, you are a liar, promote Free Speech while saying others as "Mafia", selling software that is not belongs to you, ignore to all suggestions. You are a real crime and mafia here.

That's it.

#7. iLinux Support Team 07 Mar 2022 07:07:04

@ClickNin

> *“ Let me say again, there is no "Linux Mafia Army" here.* ”

You just proved (again) that "Linux Mafia Army" is here and that it exists and that you are a Member of it.

If you were not a member of the "Linux Mafia Army", it would be impossible for you to know if anyone who writes in this Community is a Member of the "Linux Mafia Army".

Since you are a Member of "Linux Mafia Army", you would never confirm that you belong to this Paid Army of Mercenaries.

But the fact that you are absolutely sure, without any doubt, that "Linux Mafia Army" does not exist, it is solid proff that it exists and confirms what we already know.

> *“ I can show the proof now.* ”

Where is the proof?

> *“ Is that Free Speech? NOPE.* ”

Free Speech = You can write whatever you want and bare the appropriate responses.

> *“ You say that they are a part paranoid "Linux Community" when they never talked about it before.* ”

No covert organization/team ever admits it's existence.

Especially if they have been exposed.

The so called and Self Proclaimed "Linux Community" has nothing to do with the real Linux Community.

The real Linux Community is the SUM of ALL Linux Users and ALL Linux Developers.

The so called and Self Proclaimed "Linux Community" indeed controls 99% of Linux Community Websites & Linux YouTube Chanells & Linux IRC Chat Channels.

The so called and Self Proclaimed "Linux Community" is indeed the "Linux Mafia Army".

> *“ This isn't what a friendly community should be.* ”

No Censorship = Friendly

Friendly Community = You can write whatever you want and bare the appropriate responses.

When you attack someone with bad intent don't expect friendship. Expect retaliation.

When you begin War with the wrong opponent, don't expect mercy.

About the Legal stuff, READ THE "OEM & MERCHANT LICENSE" VERY CAREFULLY:

https://ilinuxos.com/oem-and-merchant-license.html

The 20 Euros (V.A.T. INCLUDED) Fee per COMPUTER or DEVICE is the Price that entitles OEM, Companies & Merchants to Sell and Distribute the Work, the Copyrites, the Intellectual Properties and the Components that the Creator of iLinux OS (George Dimitrakopoulos) has Created and Embedded in iLinux OS.

IT IS NOT for Buying, Distributing or Licensing any of the other Copyrites and Intellectual Properties included in iLinux OS, OR any of the other Free Software included in iLinux OS, OR any other kind of Free Digital Material, including but not limited to, Applications, Code, Scripts, Artwork, Icons, Fonts etc. included in iLinux OS, OR for Licensing any of the other Patents of Free Software included in iLinux OS.

IF YOU PLAN TO COMMERCIALLY USE OR COMMERCIALLY DISTRIBUTE AND SELL iLINUX OS, YOU MAY BE OBLIDGED BY LAW TO ACQUIRE THE NECESSARY LICENSES AND PERMISSIONS FROM ALL OR SOME SOFTWARE COPYRIGHT/PATENT HOLDERS OF FREE OR NON-FREE SOFTWARE COMPONENTS INCLUDED IN iLINUX OS, DEPENDING ON EACH RELEVANT SOFTWARE LICENSE/PATENT.

#8. AaronTechnic 07 Mar 2022 08:15:37

Hello, I'm back on the forum.

Honestly I'm shocked about what's going on here. Wow.

iLinux Creator, I don't want to make it a big fight but you should admit that you are the real "mafia" here.

If someone criticizes iLinux, you tell them they are a part of the Mafia Community.

When Saint IGNUcius asked about the "Linux Mafia Community", you denied saying "reverse psychology".

When ClickNin gave you suggestions, you told he is a part of the Mafia, even though he wanted to peacefully talk about it.

> *“ You just proved (again) that "Linux Mafia Army" is here and that it exists and that you are a Member of it. ”*

> *“ Linux Mafia Army" doesn't exist. I think you are looking for the term "Linux Elitists", but me and a few others on this forum are not a part of the elitist community.*
>
> *Yes, I did hate and criticize your distro, but you shouldn't just assume every criticism is bad.*
>
> > *“ If you were not a member of the "Linux Mafia Army", it would be impossible for you to know if anyone who writes in this Community is a Member of the "Linux Mafia Army". ”*
>
> *This is just stupid because in this forum there are posts everywhere about "Linux Mafia Community" and that's where I heard the term first.*
>
> > *“ Since you are a Member of "Linux Mafia Army", you would never confirm that you belong to this Paid Army of Mercenaries. ”*
>
> *I don't know what kind of person pays people to promote distros. This is false. I don't get paid for this.*
>
> > *“ Free Speech = You can write whatever you want and bare the appropriate responses. ”*
>
> *I believe that free speech can only happen as long as people's other freedoms such as freedom from discrimination are not being impeded.*
>
> > *“ No covert organization/team ever admits it's existence. ”*
>
> *....because it doesn't exist?*
>
> *"Especially if they have been exposed. The so called and Self Proclaimed "Linux Community" has nothing to do with the real Linux Community. ”*

Elaborate. Describe the "real Linux Community". Linux Community is Linux Community.

"The real Linux Community is the SUM of ALL Linux Users and ALL Linux Developers. The so called and Self Proclaimed "Linux Community" indeed controls 99% of Linux Community Websites & Linux YouTube Chanells & Linux IRC Chat Channels. The so called and Self Proclaimed "Linux Community" is indeed the "Linux Mafia Army"

That depends on the website/channel.

> *“ No Censorship = Friendly ”*

So countries like the USA isn't friendly? I do agree with your statement but I also disagree.

> *“ Friendly Community = You can write whatever you want and bare the appropriate responses. ”*

I disagree with that.

> *“ When you attack someone with bad intent don't expect friendship. Expect retaliation. When you begin War with the wrong opponent, don't expect mercy. ”*

Okay...

About the OEM, you can sell your distro, but you can't demand OEMs to pay you and that's a GPL violation.

Your distro is a GPL violation.

#9. ClickNin 07 Mar 2022 08:17:52

@iLinux Support Team

> *“ You just proved (again) that "Linux Mafia Army" is here and that it exists and that you are a Member of it. ”*

Show me a single proof OUTSIDE of this forum that something like that exist!

> *“ When you begin War with the wrong opponent, don't expect mercy. ”*

When I did that? YOU are the one who did that! You are the one that start the whole thing. Watch less films. You say that "we use logic and not emotions" (or whatever you say). Then "mercy", hah, what kind of mercy here? I didn't started any war here (and will probably never), but you does, your imagination is far from what I'm capable of.

> *“ IT IS NOT for Buying, Distributing or Licensing any of the other Copyrites and Intellectual Properties included in iLinux OS, OR any of the other Free Software included in iLinux OS, OR any other kind of Free Digital Material, including but not limited to, Applications, Code, Scripts, Artwork, Icons, Fonts etc. included in iLinux OS, OR for Licensing any of the other Patents of Free Software included in iLinux OS. ”*

Firstly, I remember you said someone in another thread that they have poor English skills, and now you does! "Copyrites" hahaha.
Ok ok, I may wrong about this, but you are selling Linux kernel too? Which is protected by GPLv2 and it's creator, Linus Torvalds, and Linux Foundation. Okay, Linux is the thing that powers your "iLinuxOS", and you are selling it, with a proprietary license, 20 Euros fee, what's more. Are you dumb or not? Selling a open source software, you make me laugh so badly. Atleast remove Linux

kernel from your system and write something that you own, so that you can license it whatever you want, you are using Linux, read the whole GPL license.

#10. iLinux Support Team 07 Mar 2022 10:38:06

@AaronTechnic

> *“ If someone criticizes iLinux, you tell them they are a part of the Mafia Community. ”*

No.

You are trying to mislead and disinform by starting the "CHARACTER ASSASSINATION" Script.

Reverse Psychology won't get you anywhere with us.

Projecting your tactics to the "Enemy" in order to confuse him and break him, mentally and psychologically won't work with us.

We know the Training Courses, Field Manuals, Textbooks and SOP you are using.

All feedback on iLinux OS is welcome (positive or negative), as long as it is based on User Experience.

If it's not based on User Experience it is Propaganda. That's what elitism is. That's what "Linux Mafia Army" is. That's what you are.

No one can judge an Operating System/Application if they haven't tried it for some time. Period.

We never said that iLinux OS is perfect and we dare you to prove us wrong, after you have done your homework...

Have you ever used iLinux or you just HATE it?

> *“ Yes, I did hate and criticize your distro, but you shouldn't just assume every criticism is bad. ”*

The keyword here is HATE.

Where there is HATE there is no Good Intent. There is just RAW HATE.

Where there is HATE there is no Critisism. There is just RAW HATE.

Where there is HATE there is no Logic. There is just RAW HATE.

Where there is HATE there is no Dialog. There is just RAW HATE.

Where there is HATE the END JUSTIFIES THE MEANS.

You have just validated in public everything that has been said in this Community about "Linux Mafia Army".

About the Legal stuff, READ THE "OEM & MERCHANT LICENSE" VERY CAREFULLY:

https://ilinuxos.com/oem-and-merchant-license.html

#11. iLinux Support Team 07 Mar 2022 10:38:51

@ClickNin

> *“ Show me a single proof OUTSIDE of this forum that something like that exist! ”*

Plenty of proof in this Forum and in Internet. Read.

> *“ Watch less films. ”*

You are trying to mislead and disinform by starting the "CHARACTER ASSASSINATION" Script.

Reverse Psychology won't get you anywhere with us.

Projecting your tactics to the "Enemy" in order to confuse him and break him, mentally and psychologically won't work with us.

We know the Training Courses, Field Manuals, Textbooks and SOP you are using.

> *“ You say that "we use logic and not emotions" (or whatever you say). Then "mercy", hah, what kind of mercy here? ”*

Mercy is a feeling.

In matters of technology and PSYOPS we apply logic. Not emotion.

> *“ Firstly, I remember you said someone in another thread that they have poor English skills, and now you does! "Copyrites" hahaha. ”*

There was indeed a spelling error. Get over it.

> *“ I may wrong about this, but you are selling Linux kernel too? ”*

READ THE "OEM & MERCHANT LICENSE" VERY CAREFULLY:

https://ilinuxos.com/oem-and-merchant-license.html

#12. Fotini 07 Mar 2022 11:44:31

@AaronTechnic you can dislike a Linux distro, you may not use it, you may disagree with it's perspective but HATE????!!!!!

You are so damaged!

#13. AaronTechnic 07 Mar 2022 14:51:22

No, Fotini, YOU are very damaged because you and the iLinux Support Team here is very arrogant. I love how he thinks I am using """""tactics""""". You guys are out of touch.

#14. Fotini 07 Mar 2022 15:26:55

@AaronTechnic

> *“ Yes, I did hate and criticize your distro, but you shouldn't just assume every criticism is bad. ”*

For crying out loud, how can a normal person be able to HATE any Linux distro?!

HATE?!

HATE??!!

HATE????!!!!

Get a life for god's sake...

#15. AaronTechnic 07 Mar 2022 15:54:34

Why don't YOU get a life? Instead of just accusing people for being in the "Linux Mafia Community".

I actually have a life.

#16. Fotini 07 Mar 2022 16:04:21

@AaronTechnic

Oh but you are...

Only a member of the "Linux Mafia Army/Community" would say that he/she HATES a Linux distro...

HATE is such a dark word full of shadow and blackness and bigotry and prejudice...

HATE is not the way of normal sentient Linux Users...

#17. ClickNin 08 Mar 2022 00:03:46

@Fotini

Hate is normal.
Imagine likes this, he say he hate Windows and like Linux, then you call him a member of "Linux Mafia"?

Everyone can like or hate the thing they wanted to, that's their permission. Hate a Linux distribution is not an exception. Well, I think you played Undertale too much I guess.

Hate has a lot of reason, because of it's community, because of it's restrictions, and the list goes on.
Like me, I really hate macOS/iOS because of their restrictions beyond user freedom. They said they do it for your privacy, but it's a jail blocking users from freedom.

Everyone have different opinion.

#18. ClickNin 08 Mar 2022 00:36:44

@iLinux Support Team

> *“ Plenty of proof in this Forum and in Internet. Read.* ”

Point me to one in the Internet.

#19. iLinux Support Team 08 Mar 2022 07:35:38

@ClickNin

> *“ Point me to one in the Internet.* ”

Easy.

Open Google and type one of the following:

linux is toxic

linux community is toxic

#20. ClickNin 08 Mar 2022 09:01:06

> *linux is toxic*

Exactly what Saint IGNUcius said, and then you said that it's "reverse psychology".
I'm really confused :3

#21. Fotini 08 Mar 2022 09:54:15

@ClickNin

> *Hate is normal.*

Your hate will consume you.

Hate is not normal in Linux and in computers in general.

Linux is about learning and love for technology.

@root is right, iLinux Developers are right. You are nothing but a "Mafia Gang"...

#22. ClickNin 08 Mar 2022 10:01:55

> *Hate is not normal in Linux and in computers in general.*

> *in computers in general.*

So that's mean only a mafia hate something? Well, think again man. I mean, is not bad to hate, and hate a Linux distribution DOESN'T mean hate Linux in general. If someone hate Linux, they shouldn't using Internet, because 99% of Internet is running in Linux. And yes Linux is a wonderful thing to experiment and learning, as it requires some skills in computer in general, that's why long time Windows/macOS users are not willing to switch to Linux, because it requires certain skills and knowledge with Terminal and stuff like that.

Well I don't hate anything but iOS and macOS, as the reason I explained above. But hey, let me tell you that hate a product doesn't mean you hate the creator behind it, and the same goes as reverse, or event hate everything that based on it.

As well, you can't force everyone to follow your own opinion, that's annoying. Everyone have different thinking and different opinion to a specific thing.
We are human and we live in the same planet, but we are not the same person.

#23. Fotini 08 Mar 2022 10:09:26

@ClickNin

When you HATE you are trying to force everyone to do things your way.

We 've seen it in this forum and in other Linux forums so many times...

Get a life thug...

You are such a lameass...

#24. Fotini 08 Mar 2022 10:12:17

@ClickNin

Android Linux spies on you as much as iOS.

Do you hate Android Linux too?

And if you do what kind of mobile phone do you use?!

#25. AaronTechnic 08 Mar 2022 10:16:25

I use a normal mobile phone because I have stuff to do. On my PC I use Ubuntu.

#26. ClickNin 08 Mar 2022 10:17:21

> *“ Android Linux spies on you as much as iOS. ”*

Atleast it's open source, and I'm a developer anyway, so I can just remove wherever it spies me.

#27. ClickNin 08 Mar 2022 10:18:04

> *“ Do you hate Android Linux too? ”*

No, in fact, I'm using it as my primary OS, as it's open source, allowing sideload, and much more.

#28. Fotini 08 Mar 2022 10:22:18

@ClickNin

So you don't hate Android spying on you because it's Open Source Linux but you hate iOS spying on you because it's not Open Source BSD.

So your problem is not about spying.

Oh you are so exposed "Linux Mafia Army" fanboy...

#29. iLinux Support Team 08 Mar 2022 10:24:26

@ClickNin

If you HATE the Freedom restrictions of Windows and macOS/iOS, then you also HATE all those "Linux Community Websites & Linux YouTube Chanells" that sell your browsing data to 1000's of capitalist companies by spying on you via Cookies, while at the same time hypocritically preach for a "Surveillance Free" Internet, Free Open Source Software and Anticapitalist "Linux Ethics".

Right?

iLinux Support Team added on 08 Mar 2022 10:33:20

If you HATE the Freedom restrictions of Windows and macOS/iOS, then you also HATE Android Linux and Ubuntu Linux that spy on you by default, as much as Windows and macOS/iOS do.

Right?

#30. iLinux Support Team 08 Mar 2022 10:25:45

@ClickNin

> *“ Hate is normal.* ”

Hate is normal if someone commits unspeakable crimes, rapes a child/woman/man, kills a person you love or if you got to war to fight an invader.

Hate is not normal if someone uses another Linux distro or Windows or macOS.

If you hate people because they use another Linux distro or Windows or macOS, you are psychopath, sociopath, paranoid or Paid Mercenary.

Hate is the weapon of the so called and Self Proclaimed "Linux Community" which is controlled by the "Linux Mafia Army".

The so called and Self Proclaimed "Linux Community" has nothing to do with the real Linux Community.

Through Hate and Toxicity you, the "Linux Mafia Army", try to imprint Fear to those you seek to control in order to enslave them and profit from them.

You like to oppress and control Users/People/Minds like a Dictator, in order to promote your agenda.

We stand on the opposite side.

Let us quote the Creator of iLinux OS, George Dimitrakopoulos:

> *“ Every Linux Distribution is different.*
>
> *Instead of thinking in terms of "better than", think in terms of "what do I need to do", try them and see which one is best for your needs.*
>
> *You can use any Linux Distro you like.*
>
> *We believe in Good Software.*
>
> *We don't care if it is Free, Paid, Open Source or Proprietary, as long as it does not violate our Freedoms and our Rights.*
>
> *We respect every User and his choices.*
>
> *After all, there is a reason behind these choices.*
>
> *We do not hate Microsoft Windows, macOS or other Linux distributions.*
>
> *We believe that users should use what they think and feel is best for them.*
>
> *And we deeply respect any User or Developer that sits in front of a computer with a dream to create something wonderful!* ”

#31. Fotini 08 Mar 2022 10:41:18

@iLinux Support Team

Different thinking indeed...

#32. ClickNin 08 Mar 2022 10:52:25

> *“ So you don't hate Android spying on you because it's Open Source Linux but you hate iOS spying on you because it's not Open Source BSD.* ”

Not true, Google open source Android because of Linux and it's GPL license! The GPL license protect Linux from being closed source, if they not do that, they will have to deal with critical legal problems from USA. BSD, in other side, are freely to use in closed source, so Apple is pretty clever to use BSD as they will not have to open source the whole system just because of the kernel, but macOS kernel are open source, but iOS, nope. It's XNU.

iOS is too restricted, using the term "user privacy" when jailing the users in a OS where you can't even sideload your favorite application, I'm not dumb enough to think that Apple actually cares about your privacy.

And, by the way, by telling us as "Linux Mafia" when we are discussing about technology, you guys hate us too, and all of our "99% of websites that sell your data" includes Kernel.org and the list goes on, so you guys are unnormal, damaged and psychopath, sociopath, paranoid or Paid

Mercenary too, isn't it? Don't call it "reverse psychology" this time, you guys say that first, right in this post, right there, right here.

> *“ You like to oppress and control Users/People/Minds like a Dictator, in order to promote your agenda. ”*

I don't have enough money for that, sorry pal.

> *“ If you HATE the Freedom restrictions of Windows and macOS/iOS, then you also HATE Android Linux and Ubuntu Linux that spy on you by default, as much as Windows and macOS/iOS do. ”*

In the reverse, I use Windows and Linux altogether in my personal PC, while using Android in my smartphone, that's it. Hate iOS/macOS because of my opinion about it's restrictions! READ IT FAST, MY OWN OPINION. You guys is not a god to control me and force me to think what you want, I'm not a puppet, neither a mafia.

Either way, you guys are causing me mental health problems right now.

#33. ClickNin 08 Mar 2022 10:53:49

> *“ And we deeply respect any User or Developer that sits in front of a computer with a dream to create something wonderful! ”*

And us as an exception? Right?
You are not respect me because I'm giving suggestions to your system, instead of saying that "these suggestions are not for iLinux", you say that I am a Mafia!

That's not respect!

#34. ClickNin 08 Mar 2022 10:55:46

And I bet you are even not read full of GPL, BSD and CC licenses yet, they exists for a reason, and you ignore it.

#35. iLinux Support Team 08 Mar 2022 11:10:14

@ClickNin

> *“ Either way, you guys are causing me mental health problems right now. ”*

Why?

We are discussing freely in an environment with NO CENSORSHIP.

Can you name another Linux Community where you can say whatever you want without Registration, without being Blocked or without being Kicked out?!

> *“ And, by the way, by telling us as "Linux Mafia" when we are discussing about technology, you guys hate us too ”*

You are the "Linux Mafia Army".

But we do not hate you even though you attacked us first and unprovoked. We expected your attack.

We never used the word HATE.

Hate is an emotion.

In matters of technology and PSYOPS we apply logic. Not emotion.

You didn't answer one important question:

If you HATE the Freedom restrictions of Windows and macOS/iOS, do you also HATE all those "Linux Community Websites & Linux YouTube Chanells" that sell your browsing data to 1000's of capitalist companies by spying on you via Cookies, while at the same time hypocritically preach for a "Surveillance Free" Internet, Free Open Source Software and Anticapitalist "Linux Ethics"?

#36. iLinux Support Team 08 Mar 2022 11:15:07

@ClickNin

We indeed deeply respect any User or Developer that sits in front of a computer with a dream to create something wonderful!

That goes for you too as a Developer.

But when you come in our Community with a "Linux Mafia Army" attitude, don' expect anything less than War.

#37. ClickNin 08 Mar 2022 11:16:40

> *“ If you HATE the Freedom restrictions of Windows and macOS/iOS, do you also HATE all those "Linux Community Websites & Linux YouTube Chanells" that sell your browsing data to 1000's of capitalist companies by spying on you via Cookies, while at the same time hypocritically preach for a "Surveillance Free" Internet, Free Open Source Software and Anticapitalist "Linux Ethics"? ”*

Well, I don't even see a site that sell my data because I turned off cookies so sites cannot bother me. Adblocker and Cookies turned off are the way to go for me (although some sites are not because they force me to enable it), cookies is just a file inside your computer to store some data so that the site can use it later on (you don't know what Cookies is isn't you?).

That's same for any Proprietary software, so that's normal for me. Basically I follow GNU's direction about freedom, which is by Richard stallman, without him, iLinux and others Linux distributions would never exists.

#38. iLinux Support Team 08 Mar 2022 11:21:01

@ClickNin

You aviod answering the question.

99% of Linux Community Websites & Linux YouTube Chanells, by default sell your browsing data to 1000's of capitalist companies by spying on you via Cookies.

iLinux Support Team added on 08 Mar 2022 11:22:22

It's difficult to turn against your own kind isn't it?

#39. ClickNin 08 Mar 2022 11:24:06

> *“ 1000's of capitalist companies* ”

Name me every single one, give me the link, I will ask one of my friend, which is a Security Researcher, to see if that site is selling the data to everyone.

#40. ClickNin 08 Mar 2022 11:24:37

A simple DNS Lookup and a bit of Fiddlering can show me if it transferring everything.

You are playing dumm right?!

Check the DEFAULT COOKIES POLICY of 99% of Linux & FOSS Community Websites.

Check the LEGITIMATE INTEREST Lists.

Check the PARTNERS List.

Most of these websites produce automated poor content as Bait for Cookies victims...

#42. iLinux Support Team 08 Mar 2022 14:51:52

@ClickNin

OUR DISCUSSION WAS CAUGHT IN THE MIDDLE OF A MIGRATION/UPGRADE BY OUR WEB HOSTING PROVIDER, SO YOUR NEXT POST AND OURS WERE "ELIMINATED" BUT SINCE WE KEEP PDF COPIES OF EVERY CHANGE IN THIS COMMUNITY WE ARE RESTORING THEM.

SO YOUR NEXT POST WAS:

Well, just give me these links.
I can use a program (written in Python) to check for all sites automatically.

#43. iLinux Support Team 08 Mar 2022 14:57:35

@ClickNin

Pick random Linux & FOSS Websites from Google.

As a "Developer" you know enough of them...

#44. ClickNin 08 Mar 2022 23:36:28

> *“ Pick random Linux & FOSS Websites from Google.* ”

Well, I know FossHub, Kernel.org, Ubuntu Site, Distrowatch, ItsFOSS, OpenSource.com, DefectivebyDesign (FSF Campaign), Canonical, Google OpenSource, Gitlab, Gitea, FOSS Analytics, and about 40+ sites that is a pain to list all of them here.
I checked every single one and look like they didn't transferring anything, atleast from my see.

#45. iLinux Support Team 09 Mar 2022 06:14:11

@ClickNin

Really?!

You are a "Developer" and you don't know how Cookies work?!

Just Google search "how do cookies work"...

Let us help you:

> *“ You are a "Developer" and you don't know how Cookies work?! ”*

Uhh did you see my messages above that, I literary explained about Cookies, they are some small files on your computer from the small packets from site to store data such as Username, Passwords, website visit statistics, etc so that the site can remember about you. They can also used as a tracker to track your activities.

And uhh, I never say I'm a Web Developer or Network Security researcher, I'm a Program Developer, are you dumb or not. The best I can understand on the web is working at packet levels of stuff. "Developer" term here means a lot. Web Developer, Program Developer, AI Developer, etc.

Regarding your point, over 100+ sites about FOSS I have visited doesn't use Cookies or AD Services to transferring my activity data or anything like that to anywhere, so I still can't believe that those kind of sites exist yet. Unless you point me to a real example.

#47. iLinux Support Team 09 Mar 2022 07:04:19

@ClickNin

In this Thread at 08 Mar 2022 10:17:21 you said that you are a Developer:

> *“ Atleast it's open source, and I'm a developer anyway, so I can just remove wherever it spies me. ”*

Are you dumm or what?

> *“ Well, I know FossHub, Kernel.org, Ubuntu Site, Distrowatch, ItsFOSS, OpenSource.com, DefectivebyDesign (FSF Campaign), Canonical, Google OpenSource, Gitlab, Gitea, FOSS Analytics, and about 40+ sites that is a pain to list all of them here.*

The following websites present a dialog about using Cookies (didn't you see it?):

Canonical

Distrowatch

FOSS Analytics

FossHub

GitLab

It's FOSS

Ubuntu
